Made in-house, using our own technology
Wide range of connector types available
Suitable for many applications
Our FPC connectors allow you to me lighter, smaller and more durable electronics

Overview

Features

We manufacture a wide range of electronical connectors, using our own technology, from material processing to the finished product. All our DDK connectors a made via the same process of stamping, moulding, plating, and final assembly.

We offer numerous connector variations including multi-pin connectors, industrial duty connectors, coaxial connectors, and optical fibre connectors. Fujikura industrial connectors are used in factories and production facilities throughout the world in equipment which is crucial to the control of complex manufacturing processes.

To discuss your connector requirements, please call or email.

For enquiries in Europe, please [click here](#) to contact your nearest European DDK approved distributor

Applications

- Mobile phones
- Computing equipment
- Automotive
- Factory automation
- Measuring instruments
- Base stations
