Fully integrated fibre management
Accepts loose tube, distribution cable and
MPO/MTP Trunk Cable
Multiple adapter options available
Individually labelled ports

Overview

Features

Specification

This innovative, robust, high density 3U chassis has been designed to accept up to 14 LGX-style assemblies. The ability to use a full array of adaptor types provides a flexible solution to the end user, enabling them to incorporate a multi-functional chassis which allows easy access during installation or re-work with no disturbance of the existing cable or fibres.

In the addition to the array of adapters, the chassis also offers multiple cable entry solutions: MPO/MTP Trunk Cables connected to 14 individual MPO/MTP LGX Cassettes with up to 24 fibres in each, loose tube cable connecting to 14 individual extended cassettes to allow standard splicing or 14 LGX modules for pre-terminated solutions - making this chassis one of the most flexible on the market.

Applications

- Data centres, premise installations, telecommunication networks
- Ethernet, fibre channel, ATM, LAN, MAN and WAN
- Data communication
- Indoor applications
