Ergonomic design
Autofocus and auto centring
IEC, IPC and user-defined pass/fail analysis
Pairs with FOCUS test app

Overview

Features

Specification

FOCIS Duel is a self-contained twin-ported Bluetooth connected fibre optic connector inspection scope with an integrated screen. The first port (right side) is fully featured, identical to FOCIS Flex. The second port (left side) has fast and convenient female style LC “click-in” adapters (as well as SC and FC tip adapters), auto-focus and 2X zoom capabilities.

The FOCIS Duel can perform IEC, IPC, AT&T and user defined end-face cleanliness analysis and store Port 1 images and reports locally. Alternatively, images can be sent to the FOCIS app (iOS and Android) which provides a comprehensive and user-friendly feature set as well as connectivity with the aeRos cloud-based workflow and test management solution

Applications

-
- Inspect connectors on bulkhead adapters (port 1) and patch cords (port 2) without swapping adapter tips
- Verify proper connector cleaning practices
- Assure critical fibre infrastructure performs properly
- Keep fibre connections working at optimal performance
- Optical network installation and troubleshooting
