Pull proof

Low insertion loss

Corrosion resistant Nickel-plated metal body

Suitable for a range of fibre configurations

Overview

Features

The FC connector is fully compliant with JIS standard C5970 and its threaded metal adaptor ensures durable, repeatable connections. It features a 2.5mm ferrule with a threaded coupling nut, which ensures it's pull-proof – ideal for a high vibration environment.

The FC connector is available as part of a fibre assembly and comes in varying options such as Super PC, Angled PC and Ultra PC polishing styles as well as single-mode or multi-mode fibre configurations suitable for 900µm, 2mm or 3mm cable diameters.

Applications

- Telecommunication networks
- Local area networks
- Data processing networks
- Distribution application
- Premises distribution
- Test and laboratory equipment
