Supports standard loose tube or ribbon fibre cables
Fully sealed
Meets Telcordia GR-771 requirements
Fully kitted to install five cables

Overview

Features

Specification

The LightGuard (LG) 250 is a sealed dome closure designed for medium count fibre splicing (up to 144 single or 432 mass) in a butt configuration. Utilised in aerial or underground environments where a sealed closure is required, the LG250 is ideal for express or ring applications and requires only a common can wrench for installation.

Applications

- Marking
- Deep engraving
- Cutting
- Welding
- Precision drilling
