Optimised for WTC
Ideal for small hand-holes
Fully sealed
Accommodates up to two WTC cables

Overview

Features

The LightGuard (LG) 350-20-WTC is a sealed dome closure designed for medium count fibre splicing (up to 144 single or 576 mass) in a butt configuration where space may be limited.

The LG-350-20-WTC has been designed and optimized for use in conjunction with Wrapping Tube Cable (WTC), with SpiderWeb® Ribbon (SWR). The WTC-focused design provides a basket for easy slack management. Additionally, WTC SpiderWeb Ribbon bundles can be routed and secured to splice trays without the use of transition tubing (when using WTC-SWR bundle splice tray retention kit), greatly reducing installation time. Transition tubing kits are also available if desired.
