Made from tough engineered thermoplastic
Access for up to 12 drop cables and 16 connections
Multi-drop grommet and cable retention
Just one can wrench required for installation

Overview

Features

The LightGuard (LG) 420 FTTx aerial weathertight fibre optic splice closure is designed for taut sheath (no slack) splicing (up to 32 single) in an in-line configuration. Utilized in aerial applications, the LG-420-FTTx is ideal for FTTx access networks by providing access for up to 12 drop cables and 16 connections, requiring only a common can wrench for installation.

Applications

- Aerial last mile FTTx
