Fully integrated fibre management
30mm bend radius maintained throughout
Internal patching field
19" rack-mountable

Overview

Features

Specification

An innovative solution for the connection and storage of interconnect cabling. This patch-only panel uses bend radius mandrels to ensure the correct bend radius is maintained at all times. The internal adapter field offers the ability to patch up to 24 LC , 12 SC simplex or 12 E2000 connections. Enclosing the patching field within the panel offers added security against accidental disconnection to the customer or network.

Applications

- Cross-connect
- Interconnect
- Telecom CPE
- Ethernet, fibre channel, ATM, LAN, MAN and WAN
- Data communication ODF and distribution
- Indoor and outdoor applications
