Durable shuttered adapter
Complies with IEC 61754-4 and TIA 604-3
High precision alignment sleeve
Low insertion loss

Overview

Features

Specification

The SC shuttered adapter integrates safety features suitable for FTTH and other telecom applications. It features a high precision zirconia alignment sleeve which provides high reliability and excellent reconnectability in all single-mode networks. Its spring-loaded plastic shutter ensures dust protection and laser safety, which is aided by the laser risk warning label. The adapters are available in standard colours and packaging.

Applications

- Specially designed for fibre to the home applications
- Telecommunication networks
- CATV, LAN and WAN
- Broadband
- Indoor and outdoor applications
