SS110 Automatic Fibre Stripper

Price: Enquire Today

Automatic Stripping Operation
Applicable to Various Fibre Sizes
RFID Technology

Overview | Features

The SS110 is an automatic specialty fibre stripper which enables multiple coating/cladding diameter stripping options. The SS110 uses RFID technology to read data from the FH-110 fibre holders and select recommended programs optimised by the user.

Application

Our high-quality specialty optical fibre strippers are built to achieve optimal fibre stripping quality for a vast range of fibre coating types. Optical fibre strippers are heavily utilized in a variety of specialty fibre optic industries, such as universities, R&D optical institutes, high power laser, photonics industries and medical applications.
