Up to four fibres
Removable splice tray for easy installation
Multiple adapter options available
Two adapter positions

Overview

Features

Specification

This lockable IP65 distribution box offers the ability to terminate 24 fibres housed in a strong robust ABS enclosure for indoor and outdoor applications. With the ability to use a full array of adaptor types, this distribution box offers a flexible solution to the end user by enabling them to incorporate a multi-functional enclosure which allows easy access during installation or re-work with no disturbance of the existing cable or fibres.

In addition to the interchangeable adaptors, the enclosure also offers up to 24 exit points for patching cables and one standard cable entry point for loose tube, tight buffer, pre-terminated and steel tape armoured cable. Each enclosure has integrated strength member tie positions and bend radius protection with the addition of a removable front door allowing for quick and easy installation.

Applications

- Data centres, premise installations, telecommunication networks
- Ethernet, fibre channel, ATM, LAN, MAN and WAN
- Data communication and telecommunication networks
- Indoor/outdoor applications
