Fast heating time
Wireless communication with Fujikura splicers
Capable of stripping 12-fibre ribbon
Large capacity battery delivers 600 stripping cycles

Overview

Features

Specification

The RS03 ribbon fibre stripper quickly and cleanly strips the UV coating from telecommunications optical fibre. With the RS03, it's possible to strip single fibres or up ribbon fibre up to 12 fibres.

This is a fibre stripper that has been developed a focus oin emphasis on ease-of-use, flexibility, and ergonomics, which is why the RS03 requires less force for the stripping process than previous generations. Furthermore, the it is equipped with a large capacity battery for 600 stripping cycles - six times longer than conventional thermal strippers.
