1-button to auto-focus, center, capture, analyze, and save
IEC, IPC, and user-defined pass/fail analysis
Untethered, compact, hand-held inspection
Use independently or pair with OTDR

Overview

Features

Specification

With the press of a single button, FOCIS Flex auto-focuses, captures and centres the end-face image, to apply pass/fail result for easy inspection.

On completion of inspection, FOCIS Flex displays image and Pass/Fail results, saves results internally and/or wirelessly transfers data to a paired FlexScan OTDR or a smart device. It is fast, small, and easy to use to enable 100% connector inspection. AFL Focus Flex enables easy and fast inspection all in a few seconds and can be used independently - without an external OTDR or display unit.

Fujikura Europe is the authorised distributor for AFL test & measurement products in the UK. In addition, Fujikura Europe is the approved calibration & repair centre for AFL Test & Inspection products in Europe.
