Low insertion loss
Metal twist-lock bayonet style connection
Plastic or ceramic ferrule
Suitable for a range of applications

Overview

Features

Our ST connector features a 2.5 mm ferrule with a twist-lock quick release bayonet connection for convenience and either a plastic or ceramic ferrule. Fujikura can supply a range of different ST connectors suitable for varying applications.

ST connectors are available for single mode UPC with yellow boots, APC with green boots and multimode PC with black or red boots suitable for either 900µm, 2mm or 3mm cable diameters. All parts meet industry standard specifications.

Applications

- Local area networks
- Data processing networks
- Distribution application
- Premises distribution
