Cleans the ferrule end-face inside an adapter or connectors on jumpers by making full use of guide cap  
Prevents transmission error or end-face damage by dirty end-face  
Comfortable and user-friendly design with one click cleaning  
Complies with EU/98/2002/EC directive (RoHS)

Overview

Features

Specification

Fujikura One-Click™ connector cleaning tools are designed to clean a wide variety of connector types (e.g. SC, ST, FC, LC, MU, E2000, MPO/MTP, MTRJ, Duplex LC, ODC, LEMO 3K.93C series connectors, etc) either directly, when mounted in an adapter or a receptacle, all with a simple single-action cleaning system (push/release).

This handy tool is effective with a variety of contaminants and with over 500 cleaning cycles per unit it also has a remarkably low cost per clean.

Why clean fibre connectors?

- Pits and scratches are often caused by dirt and other debris
- Dust, dirt, oils, etc, are everywhere and will migrate to exposed connector end-faces
- Dirty connectors attenuate signal levels and can increase digital bit error rates
- Always clean both connectors when mating / unmating

Cleaning facts

- Cleaning saves time and money
- Dirty connectors cause a major percentage of fibre optic network failures
- Prevention is simple – clean connectors
- Proper cleaning saves money by eliminating service calls caused by dirty connectors
- Proper cleaning extends the life of connects and reduces replacement costs
- Clean connectors maximize the performance of the network and reduce repair cost
