Overview

Specification

In 1976, Fujikura achieved the world's lowest attenuation record, 0.47dB/km. Ever since then Fujikura has been the industry's leading optical fibre manufacturer. ITU-T G.652.B is the most commonly used optical fibre for long-distance terrestrial application.

Applications

Large-Capacity & Low-Loss Optical Transmission in the 1310nm and 1550nm Window
