Overview

Features

Specification

FTTH (fibre to the home) is one of the hottest topics in today's telecommunication industry. For compact storage in tight space of a building, Fujikura has developed FutureGuide® SR15E, allowing smaller fibre bending radius compared to the standard G652 fibre without reducing the signal. FutureGuide SR15E is suitable for aerial drop cable, indoor cable, patch cord or any FTTx application cable.

Applications

For optical cord and cable for FTTH / LAN / Premises
