LC Connectors

Price: Enquire Today

Compact, self-retentive design
High optical performance
Low insertion loss
Available in single and duplex designs

Overview	Features

The LC connector is a compact, self-retentive multi-fibre optional backpanel connector which benefits from a latch that audibly clicks in to place to deliver a reliable high density connection. Its push/pull design eliminates ferrule end face placed torque. Pigtail, simplex and duplex LC connectors are available in different grades and are suitable for a range of different applications.

The LC connector is approximately 50% smaller than the SC connector.

Applications

- Datacentres
- Telecommunication networks
- LAN, MAN and WAN application
- Data processing networks
- CATV
- Fibre to the home
- Premises distribution
